TROUBLESHOOTING

a. General Troubleshooting Strategies

LLC Policy: The classroom computer equipment belongs to LLC and NOT to the Temple. The Temple employees are NOT our IT support. Please do not ask Temple employees for tech help. *The best solutions to tech problems are for you to be prepared and take steps ahead of time to minimize disruptions.*

Before the start of the semester:

1. Have a co-coordinator (or a class member) who can run the technology.
2. Make sure that person has attended the Coordinator's Technology Orientation.
3. Review the rare problems and solutions listed in the table on the next page.

Before each class:

1. Have the presenters email a copy of their presentation to you in its original format AND as a pdf. Save this to your flash drive and bring it to class. Consider emailing the pdf to the class members. If all else fails, they could view the pdf on their phones during class.

Note: If the slideshow is in Apple Keynote but you use a PC, the presenter should convert the show to PowerPoint before emailing it to you.

3. **Arrive early**, allowing time to prepare and set up the technology.
 - a. Coordinators whose class starts at 10am should **arrive by 9:30 am**.
 - b. Coordinators whose class starts at 1pm should **arrive by 12:30 pm**.

For each class:

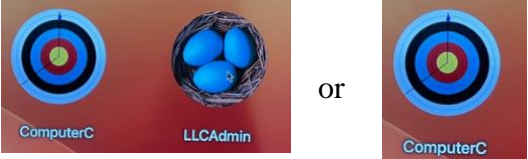

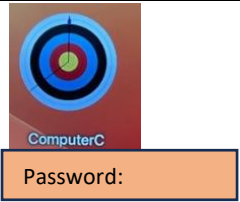

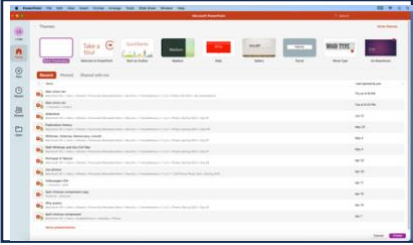

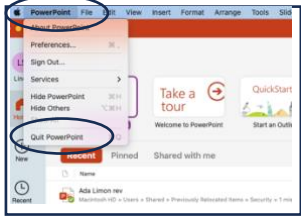

1. **Have a back-up plan** to conduct the class without access to the technology.
2. Most presentations and discussions can be adapted to a simpler format, perhaps using printouts, question sheets, photos in books or downloaded and printed etc.
3. Urge presenters to be prepared in this manner.

After each class:

1. Report ANY problem to the Technology Committee at:
TechChairLLC@gmail.com.

b. Startup Problems

Problem:	Solution:
<p>Missing Start Screen Display: Icons instead of Start Screen</p> 	<p>Click on appropriate icon.</p> <ul style="list-style-type: none"> • ComputerA or • ComputerB or • ComputerC or • ComputerD  <p>If a Password is requested, or an empty dialog box appears, place the cursor in the password dialog box and press “enter.”</p>
<p>Missing Start Screen Display: Instead, a PowerPoint or another app is on screen.</p> 	<p>Close the app.</p> <ul style="list-style-type: none"> • Click on app name in upper left corner. • Select “Quit” 
Keyboard does not respond.	<p>Charge the Keyboard:</p> <ul style="list-style-type: none"> • Use white wire in plastic box to connect Keyboard to Mac Mini. (30 mins.) • Use Mouse to navigate, open apps, advance slides, etc.
Mouse does not respond.	Change the batteries.
Odd things appear on the screen when clicking with the mouse	Make sure you are clicking with your index finger on the left side of the mouse. (Left Click not Right Click)
TV does not turn on.	<p>Replace the batteries in the TV Remote unit. Or Use the On-Off button on the back of the TV in the lower left or right corner.</p>

c. Presentation Problems

Problem:	Solution:
Links do not work.	<p>Activate links:</p> <ul style="list-style-type: none"> • If in PowerPoint or Keynote, go to edit mode, place cursor at end of URL, hit return. Return to slideshow mode try link again. • Or copy URL, paste URL into appropriate address field. • Or open Chrome, enter title of video (or other info); navigate to desired file.
Can't get back to presentation after showing linked material or video	<p>Exit full screen mode. Locate, click on desired app in Dock.</p>

Appendix

How to Safely and Reliably Get your Slideshow from Home to Class

1. **Create and Save** presentation on YOUR COMPUTER.
 - a. For PowerPoint, Keynote, MSWord and Pages
 - i. Save the presentation on your computer.
 - ii. Save it again, but as a **PDF** to prevent incompatibilities.
 - b. For Google slides or Google docs
 - i. Download slideshow as a PowerPoint
 - ii. Download slideshow again, but as a PDF.
2. **Review** your FLASH DRIVE
 - a. Insert the flash drive and check the name of it.
 - b. Open the flash drive and check the files in it.
3. **Rename** the FLASH DRIVE, if necessary.
 - a. We suggest using your last name and date to prevent any confusion.
4. **Save** presentations to the FLASH DRIVE.
 - a. Save **BOTH** the presentation in its original format **AND** the PDF.
5. **Verify** the save to the FLASH DRIVE was successful.
 - a. Remove the flash drive **SAFELY** (the icon is no longer on the screen).
 - b. Re-insert the flash drive.
 - c. Verify the name of the flash drive
 - d. Open the flash drive and verify the presentations are there.
6. **Test** the presentation, **from the FLASH DRIVE**.
 - a. Open the presentation on the FLASH DRIVE.
 - b. Practice entire presentation. Check the links and sound if applicable.
7. **Successful?**
 - a. If yes, close the presentation and remove the flash drive **SAFELY**.
 - b. If no, go back thru steps 1 – 7 carefully and try again.
8. **Presenter's presentations.**
 - a. Request their presentations by email (in its original format and PDF).
 - b. Follow the steps above, 1 – 7, for their presentation.
